ELSEVIER

J. Non-Newtonian Fluid Mech., 54 (1994) vii–viii

Journal of Non-Newtonian Fluid Mechanics

CONTENTS

Special Issue: Dedicated to Professor Ken Walters FRS, on the occasion of his 60th birthday

Preface (M.J. Crochet) ix

Introduction (P. Townsend) xi

Experimental rheology

On stability of grafted polymer molecules in elongational flows
U.S. Agrawal (New Delhi, India) and R.A. Mashelkar (Pune, India) 1

Shear thickening and time-dependent phenomena: the case of polyacrylamide solutions
D. Dupuis, F.Y. Lewandowski, P. Steiert and C. Wolff (Mulhouse, France) 11

The rheology of solutions of liquid crystal polymers formed from flexible chain macromolecules
J. Ferguson and A. Kahn (Glasgow, UK) 33

Aggregation and dispersion of spheres falling in viscoelastic liquids
D.D. Joseph, Y.J. Liu, M. Poletto and J. Feng (Minneapolis, MN, USA) 45

Normal stresses in extremely shear thickening polymer dispersions
H.M. Laun (Ludwigshafen/Rhein, Germany) 87

Shear and normal stresses of a poly(vinyl alcohol)/sodium borate aqueous solution at the start of shear flow
K. Osaki, T. Inoue and K.H. Ahn (Kyoto, Japan) 109

Measurement and modelling of friction in polymer melts during macroscopic slip at the wall
J.M. Piau and N. El Kissi (Grenoble, France) 121

Extrude distortions in linear low-density polyethylene solutions and melt
G. Pomar, S.J. Muller and M.M. Denn (Berkeley, CA, USA) 143

Normal stresses in fibre suspensions
M.A. Zirnsak, D.U. Hur and D.V. Boger (Parkville, Vic., Australia) 153

Theoretical rheology

A note on path-dependent strain measures and strain jumps in isotropic simple materials
J.D. Goddard (La Jolla, CA, USA) 195

Normal stress differences in liquid crystals and in extremely shear thickening dispersions
S. Hess (Berlin, Germany) 201

Uncoiling a polymer molecule in a strong extensional flow
E.J. Hinch (Cambridge, UK) 209

Falling spheres in polymeric solutions. Limiting results of the two-fluid theory of migration
G. Ianniruberto and G. Marrucci (Napoli, Italy) 231

Flow alignment in biaxial nematic liquid crystals
F.M. Leslie (Glasgow, UK) 241

Large and small force limits for spinning with FENE dumbell models
C.J.S. Petrie (Newcastle upon Tyne, UK) 251

Orientation of rigid, interacting particles in uniaxial flow combined with electric field
A. Ziabicki and L. Jarecki (Warszawa, Poland) 269

Numerical simulation

Extensional effects in flows through contractions with abrupt or rounded corners
A. Baloch, P. Townsend and M.F. Webster (Swansea, UK) 285

The time-dependent flow of a viscoelastic fluid around a sphere
C. Bodart and M.J. Crochet (Louvain-la-Neuve, Belgium) 303

Numerical modelling of pressure and temperature effects in viscoelastic flow between eccentrically rotating cylinders
A.R. Davies and X.K. Li (Aberystwyth, UK) 331

Quantitative prediction of the viscoelastic instability in cone-and-plate flow of a Boger fluid using a multi-mode Giesekus model
A. Öztekin, R.A. Brown and G.H. McKinley (Cambridge, MA, USA) 351

Computation of steady flow past a sphere in a tube using a PTT integral model
J. Sun and R.I. Tanner (Sydney, N.S.W., Australia) 379

Numerical simulation of semi-dilute suspensions of rodlike particles in shear flow
Y. Yamane, Y. Kaneda and M. Doi (Nagoya, Japan) 405

Dynamical modelling of viscoelastic extrusion flows
X.F. Yuan, R.C. Ball and S.F. Edwards (Cambridge, UK) 423

Flow modelling

Classification and analyses of coating flows
H. Benkreira, R. Patel (Bradford, UK), M.F. Edwards (Bebington, UK) and W.L. Wilkinson (Warrington, UK) 437

The effect of oscillation on the drainage of an elastico-viscous liquid
J.A. Goshawk and N.D. Waters (Liverpool, UK) 449

Settling and transport of spherical particles in power-law fluids at finite Reynolds number
D.I. Graham and T.E.R. Jones (Plymouth, UK) 465

Flow with impregnation of a rheokinetic liquid
A.Ya. Malkin, A.V. Baranov and S.V. Timofeev (Moscow, Russian Federation) 489

On suspension transport in a fracture: framework for a global model
J.R.A. Pearson (Cambridge, UK) 503
